

THE VISION:

To allow people in designated communities to live **freely, fully, and abundantly**—as if money did not exist—**within the existing money economy**, through a prepaid, limit-free debit card system that bypasses traditional income and expenditure models.

THE G3 LIMITLESS DEBIT CARD:

A **G3 Tangerine Limitless Debit Card** is issued to each adult (18+) in the pilot community.

Purpose:

- Enable residents to **participate fully in society** without the limitations imposed by money scarcity.
- Provide the **illusion of currency** in the broader moneyed world, while internally living the **truth of abundance**.
- Support the **growth of the moneyless model** through real-world demonstration.

Backed By:

1. **Philanthropic Investors or Sponsors** (e.g., major donors, celebrities, ethical corporations, social impact funds).
2. **Progressive Banks** (like Tangerine, known for being digital-first and flexible).
3. **A G3 Sovereign Fund** (future state): proceeds from for-profit arms of the movement like NuVo, G3 Golf, or book sales could finance this.

FUNCTIONAL MODEL:

Target Community:

- A community aligned with G3/NDG values.
- Pilot example: **NDG (Notre-Dame-de-Grâce)** or **Kahnawake** (in recognition of Native leadership).
- Eventually replicated worldwide.

How It Works:

- Every participating vendor, utility, and service provider agrees to accept the card.
- The card functions like any regular debit card—covering groceries, rent, transit, clothing, healthcare, education, leisure, etc.
- The user does **not** see a balance. The card simply works when used within its approved scope.

Controls:

- Limits may be applied only for abusive behavior, not for spending.
- Purchases are tracked **not to judge**, but to **improve systems** (e.g., ensuring community needs are being met, or identifying gaps).
- AI-assisted systems monitor health and sustainability of the flow.

PSYCHOLOGICAL & SPIRITUAL TRANSITION:

This initiative is not just economic—it's **transformational**.

- People begin to **live without fear** of not having enough.
- **Purpose and passion** rise as survival pressure is relieved.
- **Generosity blooms**—people begin contributing gifts and services freely.

INTEGRATION INTO THE GREATER ECONOMY:

Moneyless communities **remain in dialogue** with the moneyed world by:

- Paying bills using the debit system.
- Purchasing goods from outside regions (i.e., logistics, shipping).
- Hosting visitors and tourists, creating **conscious economic tourism**—people come to experience the Heaven-on-Earth model and contribute financially.

SCALING:

1. **Prototype** in a small area with full monitoring and community support.
2. **Document stories** and testimonials—how lives are changed.
3. Launch a **documentary** + book + TEDx-style presentations.
4. Engage municipalities, NGOs, UN affiliates, and indigenous nations for replication.

BANK PARTNERSHIP WITH TANGERINE:

Tangerine (owned by Scotiabank) is ideal due to:

- Their digital-first infrastructure.
- Previous involvement in social-good initiatives.
- Willingness to innovate in fintech and social finance.

You could pitch it as:

“A revolutionary model of **banking human dignity**, not capital. Back the future with G3.”

NEXT STEPS:

1. **Create a 3-page pitch deck** for G3 Limitless Card.
2. **Build strategic alliances** with Tangerine or alternatives (EQ Bank, Vancity, Alterna).
3. **Identify first community** for rollout (likely NDG).
4. **Seek angel donors** to underwrite Phase 1 (20–200 participants).
5. Develop a **governance team** for ethics and scalability.

CLOSING THOUGHT:

The G3 Limitless Card is not just a card.

It is **Heaven's handshake with Earth**—a covenant of trust between a new world and the old.

Where money once stood as gatekeeper, love now opens every door.
